OPEN BOTTLES ON SHABBOS

The Shabbos Bottle Opener will allow you to pull off the bottle cap with the ring still attached. The ring may sometimes partially separate from the cap, however this does not affect the kashrus of the Bottle Opener or the opened bottle. See attached *Haskamos Harabanim*.

The "Shabbos Bottle Opener" may be used on Shabbos and Yom Tov each time one needs to open a bottle. One may find it easier to replace the opened bottle with a ringless cap, thereby enabling one to re-open the bottle without the Shabbos Bottle Opener. We recommend setting aside a bottle cap from a previously finished bottle for just such a purpose.

If you need to close the bottle and you do not have a ringless cap, you can put the original cap with its intact ring back onto the bottle. To re-open the bottle, you will need to use the Shabbos Bottle Opener again.

THE SHABBOS BOTTLE OPENER

Congratulations! As the owner of the amazing Shabbos Bottle Opener, you can now enjoy freshly-opened bottles of soda on Shabbos and Yom Tov within the rules of *halacha*. No more flat soda, opened the day before!

Please note: the Shabbos Bottle Opener will work on most common plastic soda bottle caps found in the USA. It is not recommended for use on soda bottles made in other countries and is not recommended for Vintage brand seltzer bottle caps and similarly shaped bottle caps.

INSTRUCTIONS

Step 1. Open bottle cap until you feel resistance (turn cap counter-clockwise), just before the ring may start separating from the cap.

Step 2. Unscrew the top of Shabbos Bottle Opener halfway. Open latch, and then slide the thin blade into the gap you created in Step 1, between the ring on the cap and the lip of the bottle. Click the latch closed.

Step 3. Tighten Top Screw firmly by turning clockwise.

Step 4. Grip the Shabbos Bottle Opener by the middle and open the bottle by turning counter-clockwise. You may need to hold onto the cap while turning the Opener. When the cap feels loose, pull upward to free the cap from the bottle.

Step 5. Replace cap with ringless cap or original cap.
